

Who Is Carolina Distance Learning®?

We produce hands-on laboratory kits and materials for online science courses. These kits and materials are designed and tested for safety, efficacy, and rigor in the home setting. **They are developed by college educators for college educators and their students.**

Experienced

Cumulatively, team members have 67 years of experience teaching, 29 of which include online teaching. Two team members are currently adjunct online instructors.

The Carolina Distance Learning® Team

The team includes 6 full-time staff—5 Distance Learning Specialists and a Director. All have science backgrounds and teaching experience in a variety of disciplines.

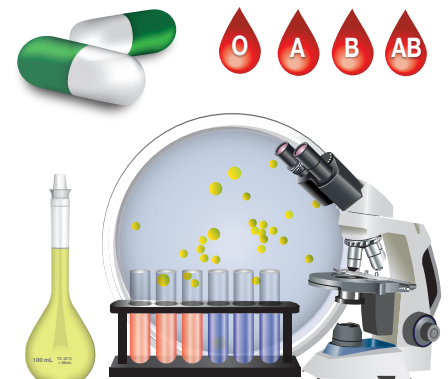

Diverse

Team members come from diverse science backgrounds, including biology, chemistry, environmental science, molecular biology, biochemistry, neuroscience, physiology, marine biology, and science education.

Skilled

Presenting a broad skill set, team members have worked in fields such as medicine, science writing, scientific instrumentation, diagnostic laboratory testing, university lab management, and instructional design.

Request a Free Sample Kit

Now that you know who we are, visit www.carolina.com/distancelearning to learn more about the kits, materials, and services we offer. While you're there, contact a Distance Learning Specialist to request a free sample kit for evaluation.
